

BEVERAGE CONTAINER MANAGEMENT BOARD

## Beverage Container Database Now Online

All beverage containers registered for sale or distribution in Alberta can now be found online in a new [searchable database](#). Over 130,000 containers are currently registered for sale in the province. Registration ensures the container is recyclable and can be returned to a depot for a refund of the deposit paid when purchased.

The following product information can be found in the database:

- brand/name
- flavour (if applicable)
- alcoholic or non-alcoholic
- container material (ie. glass, plastic, aluminum)
- container size
- UPC
- an image of the container (images are available for many, but not all containers – more will be added as they become available)
- container recycling fee
- refundable deposit amount

Provincial legislation requires manufacturers/distributors selling products in Alberta to register with the Beverage Container Management Board (BCMB) prior to sale or distribution. The Alberta Gaming and Liquor Commission (AGLC) handles all warehoused alcoholic product registrations in Alberta and reports those registrations to the BCMB.
