DEPOT NOTIFICATION RE: MEDEA VODKA 750 mL Glass Non-Refillable Container

Attention depot operators and staff,

This notice is to inform you that the Medea Vodka 750 mL glass non-refillable container was incorrectly registered by AGLC and a limited amount of containers are available for sale in Alberta. Approximately 5,364 containers are currently in the market for purchase by consumers. This container has an electronic attachment that is a contaminant to the glass material stream. These containers bear a deposit and a refund for consumers who return the containers must be given.

Once a depot purchases these containers from consumers they must remove and discard the electronic attachment prior to putting it into to non-refillable under 1 L glass sort.

The Medea Vodka 750 mL glass non-refillable container is currently not shown as being registered in the BCMB Registration Portal as no additional containers will be allowed to be sold in Alberta. We are working with AGLC on processes to ensure that this does not occur again.
