ATTENTION DEPOT OPERATORS AND STAFF:

CRIS Codes in Online Database: Depot Help Request

The BCMB Registration Database now includes the CRIS Code associated with each container. CRIS Codes for Products that should be included in **Plastics (Other)** may not be correct. We need your help to identify those that are not correct. **Please create a ticket to notify us of any Container Codes that are not correct and if possible include an image of the container.** We will work to correct errors immediately. Products that were registered prior to the comingling of several unique plastic sorts into the Other Plastic CRIS Code such as HDPE Under or Colored PET may still have the old CRIS Code associated with it or the wrong Code.

From the Portal located on <http://portal.bcmb.ab.ca/Product> click on the **ADVANCED** button to search by Product Type, Size, Material, or CRIS Code.

In the future the BCMB Registration Database will include images of both the label and UPC to assist in container identification and staff training. Before we publish images we want to ensure that all products previously registered are entered correctly and have the correct CRIS Code.

Thank you in advance for your help on making the Database complete. If you have any questions, please direct them to Melissa Malin at 780-424-3193 x221 or by email mmalin@bcmb.ab.ca .
