TO: BCMB Registrants

RE: **Changes in Beverage Container Registration Process**

Effective immediately, the BCMB will require additional information from registrants for each beverage container registration. The additional information required is as follows:

- Label composition
- Method by which the label is affixed to the container
- Specification document for the beverage container

In collaboration with the Alberta Beverage Container Recycling Corporation (ABCRC), the BCMB is working to ensure that all components of registered beverage containers are recyclable, including the label and the method by which it is affixed.

The online registration portal does not yet require this information to complete a registration, however the BCMB is actively working toward this portal update. Until the portal update is complete, the BCMB will send an email following submission of a beverage container registration requesting the additional information noted above. Please be advised that the BCMB cannot determine whether a beverage container can be registered and allowed into the Alberta Beverage Container System without the above information.

Should you have any questions, please feel free to contact the BCMB Registrations Team:

<https://www.bcmb.ab.ca/contact/>

Thank you.
