TO: Alberta Beverage Container Recycling Industry

RE: **BCMB Registration Portal Maintenance - COMPLETE**

This is an update regarding the BCMB Registration Portal maintenance that began on August 28, 2020. Maintenance is now **complete** meaning the Registrations Portal is back online and ready for use by the industry.

Registrants: You may now access your registrant account and register containers using regular processes.

Depots: You may now access the Portal to determine whether a beverage container is registered. However please continue to submit Container Validation Requests via QMS. If you need assistance in accessing the QMS app, please review the QMS User Guides which can be found at the following link: <https://www.bcmb.ab.ca/qms-app/>

Public Inquiries: Should you have any questions from the public in relation to the registration of beverage containers, you may direct them to the Registrations Portal to look up a specific container or for general inquiries, direct them to contact the BCMB at info@bcmb.ab.ca.

We'd like to thank Depots, Registrants and the Public for your patience and understanding during this process.
